Function to compare time:-

The screenshot displays the Node-RED web interface. On the left, a sidebar shows various node categories: 'filter nodes' (html, json, xml, yaml), 'storage' (Db2 in/out, cloudant in/out, dashDB in/out), and 'social' (Typeform List, Typeform). The main workspace shows a flow diagram with nodes including 'timestamp', 'function', 'Medicine', 'delay 5s', and 'form'. On the right, the 'Edit function node' panel is open, showing the following JavaScript code:

```

1 var d = new Date();
2 var utc = d.getTime() + (d.getTimezoneOffset() * 60000);
3 var offset = 5.5;
4 newDate = new Date(utc + (3600000 * offset));
5 var n = newDate.toISOString();
6 var date = n.slice(0,10);
7 var time = n.slice(11,16);
8 global.set('time',time);
9 msg.payload = date + " " + time;
10 return msg;

```

The 'On Message' tab is selected in the function node editor. The bottom status bar shows 'Form creation.pdf' and a 'Show all' button.
